My only real gripe is that moving stores between floors is a huge pain and inevitably wastes points since you lose store levels if you remove a store. There's also a couple minor animation glitches. But aside from that, it's about what you'd expect from a Kairosoft sim. Worth the purchase!Katelyn Webster: Fun but could use some work. There is no real tutorial and no guidance on what stores are compatible on what floors. You can not rotate the screen and zooming in and out is very minimal. I did enjoy the game and will play again.Paul Allen: Love it. Fast moving with constant levels of activity that makes it hard to put down. Theres always more to do, more points to spend. When you get your first combos in, your mall goes bananas.Joel O: So I loved this game, it's the usual Kairosoft thing, but what I disliked was that certain stores were only compatible with certain floors, and there isn't a clear reasoning why nor an in-game guidance on this. This means it's trial and error and to optimise or metagame it means MMS2 becomes a really rigid game. If you ignore that just have fun since you can't lose.A Google user: One of the more hectic Kairo games, very easy to get overwhelmed by the sheer amount of requests, new shops, competitions, upgrades, VIPs, etc. Never dull though, just wish it was easier to tell what's going on and move things around.A Google user: So this is a good game but it gets rather repetitive towards the end when you have enough money to do basically anything. Getting the final rank up is too easy, compared to GP story when winning the final race is a challenge, this game makes the end feel hollow.A Google user: An excellent kairosoft game. True to form. It's nice to see them improving this new game engine and adding things. The only thing I would say is that things tend to move too quickly and they could do by slowing down and metering out some of the new building and Shop types.A Google user: Liked the variety of stores compared to the first one. Same great addictive gameplay. And I agree there needs to be a way to show if you have completed a combo or not- there are so many I cannot keep track.A Google user: There are a few typos, like one mission is to build a Tapas Bar on F, but it just means 1F.. Overall, I like it. I think the smaller menu and buttons work to it's advantage since they're on the side and out of the way.A Google user: Not good, folks. If you loved the old game, give this one 8 seconds and it will break your heart. A tiny UI, buttons in terrible places, a complete forfeiture of font-size control, and an annoying "assistant" who doesn't help with anything. Don't buy this one, folks. I hurts.
